

Me and my family plus many friends have enjoyed listening to KLOVE on FM translators. I work 50 miles from home and travel often throughout the state and the country. I greatly appreciate the opportunity to switch between stations in order to continue listening to one of the stations that I enjoy most. I believe that KLOVE provides a definite void in our current day's radio programming and would hate to lose this possibility. I request that you continue to allow the current FM translators to provide their radio programming without change. I would not want the new broadcast service of LPFM to remove the stations I listen to most.

Thank you,

Rick Williams
